## PULSAR ${ }^{\bullet} 25 \mathrm{H}$

## HYDRAULIC DIAPHRAGM METERING PUMP

PULSAR 25H is a leak-free, hydraulically balanced diaphragm metering pump, engineered for precise dosing and long-term dependability to deliver superior value. It includes exclusive hydraulic diagnostics that provide immediate visual intelligence about pump and system performance. The PULSAR HYPOPump ${ }^{\circledR}$ configuration is the ideal choice for Sodium Hypochlorite or other off-gassing and difficult to handle fluids. PULSAR 25H is commonly used for applications in industries such as chemical processing, petrochemical, oil \& gas, water \& wastewater treatment, and power.

Applications

- corrosion inhibitors
- anti-scalants
- slurries
- Sodium Hypocholorite
- disinfection
- pH and odor control

Flow
up to 121 gph ( 458 lph )

Pressure

## Temperature

up to $230^{\circ} \mathrm{F}\left(110^{\circ} \mathrm{C}\right)$

API 675, CE, ATEX

Standard materials of construction

- Wet end: 316LSS, PVC
- Diaphragm: Composite or Solid PTFE
- Pump body: Aluminum
- Valve ball: 316LSS, Alumina Ceramic
- Valve gaskets: PTFE
- Valve seat: 316LSS, PVC

## Connection types

- NPT
- Raised-face Flange

## Controls

- DLC - stroke length
- DLCM - stroke length/motor speed
- MPC - motor speed
- ECA - stroke length

Leak detection

- PULSAlarm ${ }^{\circledR}$
- Pressure based
- IP66 NEMA Type 7/4X

## Duplex configurations

## PULSAR HYPOPump

- The solution for injection of sodium hypochlorite and other off gassing fluids
- Fully integrated closed loop design, no external valves or piping required
- Balanced, low stress, dynamic seal ensures extended operating life
- 3 year HYPO valve warranty

## FLOW \& PRESSURE ENVELOPE BY PISTON SIZE (mm)

## FEATURES \& BENEFITS

- Patented hydraulic diagnostic window yields instant visual indication of system overpressurization, entrained air in hydraulic fluid and diaphragm integrity
- Hydraulic Performance Valve maintains optimum diaphragm position and allows low suction NPIP of 3 psi (0.2 bar)
- Push-to-prime valve allows quick manual priming of the hydraulic system in addition to automatic air bleeding
- Four bolt tie bar design provides ultimate resistance to piping moments and forces
- Three component check valves for controlled rise, assuring proper valve operation, extended valve seat life, and metering accuracy
- Externally adjustable hydraulic by-pass valve protects against over-pressurization
- Manual self-locking stroke length adjustment with resolution of $0.5 \%$ for set point accuracy

## CUSTOM ENGINEERING

- Compatible materials: Alloy C, Alloy 20,

Monel ${ }^{\circledR}$, DuplexSS, Titanium, PVDF

- Minimum temperature to $-10^{\circ} \mathrm{F}\left(-23^{\circ} \mathrm{C}\right)$
- Multiplex configurations
- Manual Degass Valve
- Custom electronic controls
- Chemical feed systems
- Application consulting

## SPECIFICATIONS

| Materials | 316 LSS, PVC | Max temp | $230^{\circ} \mathrm{F}\left(110^{\circ} \mathrm{C}\right)$ |
| :--- | :--- | :--- | :--- |
| Diaphragm type | Flat | Min temp | $40^{\circ} \mathrm{F}\left(4.4^{\circ} \mathrm{C}\right)$ |
| Motor power | $0.33 \mathrm{hp}(0.25 \mathrm{~kW})$ | Accuracy | $\pm 0.5 \%$ |
| Motor frame | NEMA 56C, IEC 71 B 14 | Standards | API-675, CE, ATEX |

## DIMENSIONS

Inches [Millimeters]
Approximate shipping weight: $95 \mathrm{lb} .(43 \mathrm{~kg}$.

The dimensions given may differ depending on pump configuration.
