

## ***TSF Systems - Tank, Stand & Feed Pump***

Pulsafeeder's TSF System is a complete compact feed system from 7.5 up to 15 gallon capacity. The chemical storage tank and metering pump both mount on a common, fitted base for a precise, secure installation. The 15 gallon tank has a low level indicator that allows visual monitoring of supply without opening the tank and the tight fitting lid keeps the chemical free of contaminants.

The 15 gallon capacity tank satisfies a wide range of requirements, plus the system accepts the full MEC-O-MATIC Stingray Series, CHEM-TECH Series 100, and popular PULSAtron metering pumps, ranging up to 44 GPD.

The system is constructed of the finest quality materials available and backed by Pulsafeeder's warranty.

### **FEATURES**

- 7.5 or 15 Gallon Tank Capacity
- Low Level Indicator On 15 Gallon Tank
- Tight Fitting Lid
- Fitted Base For Mounting Tank And Pump

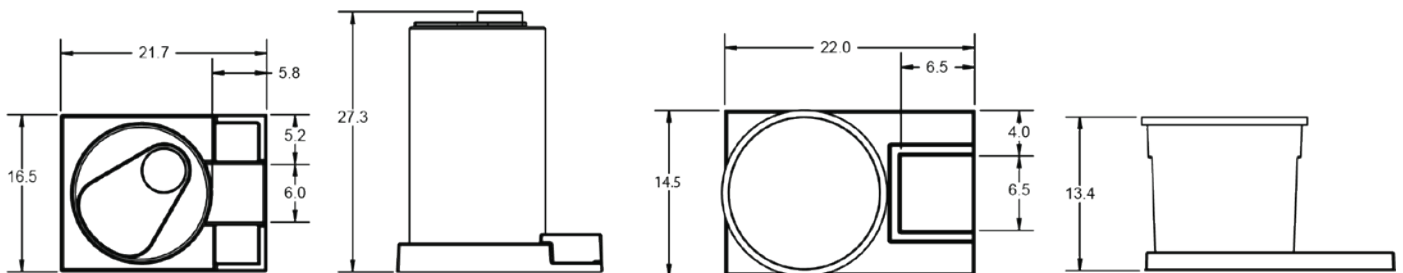

### **OPERATING BENEFITS**

- Simple Installation Easy to maintain
- Secure
